IN-HOUSE **BRANDING SOLUTIONS**

Branding gives you the opportunity to take a great style and transform it in a way that improves your brand awareness. Whether you choose traditional branding methods such as Embroidery, Screen Printing and Sublimation Printing or prefer something state-of-the-art with vibrant photo-realistic results, such as Digital Transfer - you can create the right look and feel for your brand.

WHY SHOULD YOU BRAND?

The essence of promotion is to make your mark on customers. Our apparel is designed to enhance your brand and leave a lasting impression.

TRADITIONAL BRANDING SOLUTIONS

EMBROIDERY

Embroidery is the art of decorating fabric with designs stitched in strands of thread. Embroidery machines are driven by computers that read digitised Embroidery files created by special software.

SCREEN PRINTING

Screen Printing is the process whereby a logo is transferred onto a garment via a mesh screen. This method provides excellent coverage and is especially good for large and bold logos. Colours are printed one at a time, so accurate registration is essential.

SUBLIMATION PRINTING

A full-colour digital image is printed onto specialised paper using specialised inks. The paper is firmly adhered to the garment surface and when heat is applied to the image on the paper by way of a heat press machine, the ink on the paper is transformed from a solid to gaseous state, infusing with the fibres of the garment.

STATE-OF-THE-ART BRANDING SOLUTIONS

DIGITAL TRANSFER ON CLOTHING

Digital Transfer on Clothing is a process by which a digital image is printed onto specialised transfer paper. The transfer is then applied to the garment using a heat press process. Specialised digital printing machines use liquid ink instead of toner ink to ensure long-lasting flexibility and durability of your logo. This process, using state-of-the-art technology, creates vibrant, photo-realistic results and is the perfect choice for fine detail and full colour logos.

**JOIN THE DIGITAL TRANSFER PRINTING REVOLUTION
AND BRING YOUR BRAND TO LIFE**

OUT-OF-THE BOX BRANDING SOLUTIONS

DEBOSSING

A logo is pressed into the surface of a garment using heat and pressure to create a permanent stamped impression. This branding process is both subtle and classy, resulting in a unique tone-on-tone look and is a great choice for waterproof garments.

LASER ETCHING

Using an advanced laser, the dye from the material surface is removed from a garment by way of a Laser Etching technique, creating a modern tone-on-tone look which cannot be replicated by any other process.

As depicted below, the result and clarity of laser may vary depending on the colour, style and material of the garment. To illustrate the variance, we branded the same logo on 7 different colours of the same garment.

Given the less-than-desirable outcome (as seen on the swatch on the left) we do not offer Laser Etching on certain garment colours.

NEW

SILICONE TRANSFER

Silicone transfer creates a raised and flexible print that is durable and has a higher resistance to fading, cracking and peeling, making it ideal for high-wear items such as workwear, sports gear and uniforms. The raised texture of the print provides a sophisticated, eye-catching finish.

COMBINATION BRANDING

With our multi-method-multi-position branding capabilities and your creativity, our range provides the platform for you to have some fun. **IT'S YOUR BRAND, DO IT YOUR WAY.**

1. Pair the vibrant colour of next generation Digital Transfer with the subtlety of Laser Etching for a distinctive branding effect.
2. Pair the traditional method of Embroidery with the subtlety of Debossing or Laser Etching to make a bold statement that cannot be ignored.

NEW

Designed with the future of our planet in mind.

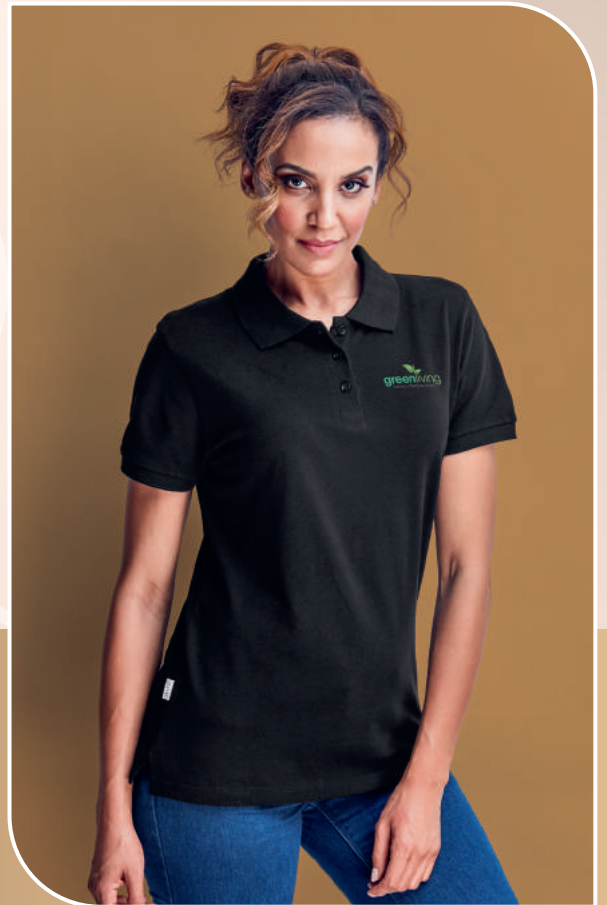

Discover the Okiyo apparel collection and experience stylish, sustainable clothing that looks good and feels great. This collection is committed to making a positive impact on the environment and is made from organic cotton or recycled materials.

Why Organic Cotton?

Organic cotton is naturally cultivated without the use of any synthetic agricultural chemicals, fertilisers, pesticides or transgenic technology. It was first planted in the 1980's in an attempt to secure sustainable, ecological and biodynamic agriculture. Organic cotton is one of the most environmentally friendly material options, as the production process uses less energy, releases fewer greenhouse gases and due to the improved soil quality, uses significantly less water.

Why Recycled?

Made with environmental mindfulness, our Okiyo collection utilises recycled or sustainable materials. These garments are another step in our journey towards reducing our footprint and impact on the environment.
